

# Child Care Providers UNITED

## Every American Needs Quality

Quality child care is a fundamental right for every child. Child care providers offer peace of mind for parents and continuity for children, while enabling Californians to work and support their families. Quality child care is essential for a fully economic recovery in the 21st century.

Our registered and licensed child care providers across California are currently operating with minimal, human services and health program cuts. We need your support to ensure that our children and families are protected during this crisis. Please contact your local health care provider.

# Child Care Providers UNITED

## Join Assembly Member Monica Torres

Quality child care is a fundamental right for all children. Child care providers offer peace of mind for parents and continuity for children, while enabling Californians to work and support their families. Quality child care is essential for a fully economic recovery in the Golden State.

As a registered voter and member of Child Care Providers United in California, I am especially requesting your participation, human voice and health program reform legislation (SB 1000) in person at the Assembly and San Jose conference a living witness California's Healthy Plan Day.
